DETAILED ACTION

Response to Amendment

Claim Objections

Claims 9 and 19 are objected to because of the following informalities: The claims should recite contacting the lesion with the instrument. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action: ~

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-11, and 13-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Zadno-Azizi (WO 98/38930). See Figure 18 and the respective portions of the specification. Zadno discloses a method of protection against stroke comprising the steps of inserting a distal end of a catheter (406) into a carotid artery, locating a first expandable balloon (408) within a common carotid artery (404) proximal a lesion (not numbered) in an internal carotid artery (400), locating a second expandable balloon (430) within an external carotid artery (402), expanding the first expandable balloon to occlude the common carotid artery, expanding the second expandable member to at least partially obstruct the carotid artery thereby abolishing antegrade blood flow in the

internal carotid artery, wherein the blood flow proximal of the balloon (422) is reversed to flow over the lesion and toward the common carotid artery, performing an angioplasty procedure on the lumen that can include aspiration and stenting (claim 13), wherein the blood flow in the internal carotid artery is revered (by occluding or aspiration) to pass over the lesion and toward the CCA, wherein the second balloon can be expanded before the first, wherein the second balloon is expanded to occlude the ECA, and wherein the distal end of the catheter carries the first and second balloons.

Double Patenting

The Double Patenting rejections have been withdrawn in light of the terminal disclaimer filed 3/16/2007 and approved 4/5/2007.

Response to Arguments

Applicant's arguments filed 3/16/2007 have been fully considered but they are not persuasive. In response to the Applicant's argument that Zadno-Azizi does not teach reversing blood flow in the internal carotid artery, the Examiner respectfully disagrees. Aspiration is performed through the main catheter (406) to reverse the blood flow in between the first balloon (408) and the second balloon (422).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,423,032 to Parodi US 6,540,712 to Parodi et al. US 6,582,396 to Parodi Art Unit: 3763

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Stigell whose telephone number is 571-272-8759. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
